

Causal Inference for Early Identification of Pathogenic Social Media Accounts

Hamidreza Alvari

Supervisor: Dr. Paulo Shakarian

Arizona State University

www.public.asu.edu/~halvari/

- Formulated the problem of early detection of Pathogenic Social Media Accounts (e.g. ISIS supporters) as a casual inference problem
- Proposed decay-based causal metrics to compute causality scores of PSMs
- Proposed a causal community detection-based framework for early identification of PSMs
